

Switchcraft® RoHS Information

We are posting a list of our product lines with the “Y” or “N” remark next to the product line. “Y” means the product is currently compliant with the RoHS directive. “N” means it is not currently compliant. We will periodically update this listing. Part numbers that have to be changed will carry an “X” suffix to indicate the RoHS version. We will not add the “X” suffix to product that is currently compliant. If you have any further questions or need more information, please contact customer service at Switchcraft. Our part number listing begins below.

Effective July 1, 2008, the European Court of Justice has annulled the Decabromodiphenyl Ether (Deca-BDE) exemption to the EU RoHS Directive. Unless otherwise noted this change does not affect stated RoHS compliance Status.
